

**APPENDIX “C”**  
**APPROVED PLANT LIST**

The Committee has found the plants included in the following list to be inherently compatible with the natural desert existing at Estancia and encourages their use. Any species not contained herein may not be planted or installed within Estancia without written approval from the Committee. All species of cacti, trees or shrubs not listed below, which have been found to be indigenous to the area, are acceptable for use within Estancia, but the Committee must approve their specific uses.

Non-indigenous plant materials which normally reach a mature height greater than twenty (20) feet may not be used in Estancia.

An asterisk precedes indigenous species (\*), which are also in **Bold** type. **Only indigenous plants may be used in the Natural Areas and the Transition Areas outside the site walls.** The density and mix of any added indigenous plant material should be approximate those found in the general area.

**TREES**

<u>Genus</u>	<u>Common Name</u>	<u>NAOS</u>	<u>Transition</u>	<u>Private Area</u>
Acacia Abyssinia	Abyssinian Acacia	NO	NO	YES
<b>*Acacia constricta</b>	<b>Whitehorn</b>	<b>YES</b>	<b>YES</b>	<b>YES</b>
Acacia eburnia	Needle Acacia	NO	NO	YES
Acacia farnesiana (smallii)	Sweet Acacia	NO	NO	YES
<b>*Acacia Greggii</b>	<b>Cat Claw</b>	<b>YES</b>	<b>YES</b>	<b>YES</b>
Acacia occidentalis		NO	NO	YES
Acacia schaffneri		NO	NO	YES
Acacia species		NO	NO	YES

<b>*Peniocereus Greggii</b>	<b>Desert Night</b>	<b>YES</b>	<b>YES</b>	<b>YES</b>
Yucca Aliofolia	Spanish Bayonet	NO	NO	YES
<b>*Yucca baccata</b>	<b>Banana Yucca</b>	<b>YES</b>	<b>YES</b>	<b>YES</b>
Yucca Brevifolia	Joshua Tree	NO	YES	YES
Yucca Carnerosana	Giant Spanish Dagger	NO	NO	YES
<b>*Yucca Elata</b>	<b>Soaptree Yucca</b>	<b>YES</b>	<b>YES</b>	<b>YES</b>
Yucca Gloriossa	Spanish Dagger	NO	YES	YES
Yucca Recurvifolia	Pendulous Yucca	NO	YES	YES
Yucca Rigida	Blue Yucca	NO	YES	YES
Yucca Rostrate	Big Bend Yucca	NO	YES	YES
Yucca Schottii	Mountain Yucca	NO	YES	YES
Yucca Thompsoniana	Thompson's Yucca	NO	YES	YES

### **REVEGETATION SEED MIX**

Note: This is not a replacement for re-vegetation with one (1) gallon and five (5) gallon and larger plant material.

### **TREES, SHRUBS AND FOLIAGE**

<u>Genus</u>	<u>Common Name</u>	<u>Rate in Ounces/acre</u>
Ericameria	Turpentine Bush	3.0
Eriogonum fasciculatum	Desert Buckwheat	0.5
Acacia greggi	Catclaw Acacia	2.0
Prosopis juliflora	Native Mesquite	1.0
Callidandra eriophylla	Pink Fairy Duster	1.0
Cercidium floridum	Blue Palo Verde	1.0
Yucca elata	Soaptree Yucca	1.0
Viguera deltoides	Vigeriaq	0.5
Cercidium microphyllum	Foothills Palo Verde	1.0
Baileya multiradiata	Desert Marigold	0.5
Lupinus sparsiflorus	Lupine	0.5
Escholtzia Mexicana	Mexican Poppy	0.5
Phacelia campanularia	Blue Bells	0.5

**Recommended Application Method:**

Rip or scarify all areas to be seeded to a minimum depth of 4". Cover all areas that have excessive amounts of hard granite (hardpan) or alkaline soil with a minimum of six (6) inches of friable topsoil after ripping. Broadcast seed mix at the rates described above in a uniform manner ensuring that all areas are evenly covered; either mechanical or hand broadcasting methods are acceptable. Mechanically drag or rake all seeded areas after all seed is uniformly applied. Ideally this should happen after the boxed plant material is installed, and before the small containerized plants are installed. No supplemental irrigation is required.

## APPENDIX “D”

### **PROHIBITED PLANT LIST**

The following may not be planted or maintained anywhere in Estancia:

1. Any species of tree or shrub whose mature height may reasonably be expected to exceed twenty (20) feet, with the exception of those species specifically listed as approved by the Committee.
2. All Palms (Palmae) whose mature height may reasonably be expected to exceed six (6) feet will be prohibited for aesthetic reasons as well as their high maintenance requirements. Dwarf varieties whose mature height may reasonably be expected to be less than six (6) feet will be allowed only in Private Areas within the confines of a private garden and behind site walls.
3. All Pines (Pinus), cypress (Cupressus), False Cypress (Chamaecyparis), Juniper or Cedar (Juniperus) except those species specifically approved, whose mature height may reasonably be expected to exceed six (6) feet will be prohibited for aesthetic reasons. Dwarf varieties, and those whose mature height may reasonably be expected to be less than six (6) feet, may be used immediately adjacent to the entry to a Residence, or in Private Areas within the confines of a private garden and behind site walls.
4. Olive trees (*Olea europaea*) will be prohibited for reasons of their profuse production of allegry producing pollen, as well as for aesthetic reasons.
5. Oleanders (*Nerium oleander*) and Thevetia (*Thevetia* species), will be prohibited for aesthetic reasons as well as for their profuse production of allergy producing pollen. These poisonous plants will also be prohibited for their high maintenance requirements and excessive height. Dwarf varieties may be allowed in Private Areas within a private garden and behind site walls.
6. Fountain Grass (*Pennisetum setaceum*) will be prohibited, as this is a defined as a weed with the potential to spread throughout the development and also as a fire hazard.
7. All varieties of Citrus will be prohibited for aesthetic reasons and for their profuse production of allergy producing pollen, and there tendency to attract rats. Dwarf varieties are permissible in Private Areas within the confines of a private garden and behind site walls. All Citrus varieties must be planted in pots or boxes above ground, not in the ground, and the pot or boxes can be no larger than 24 Gallons. A maxi-

mum of 5 potted or boxed Dwarf Citrus trees may be place in a private area, and shall not be seen from neighboring owners, the street or the golf course.

8. Common Bermuda Grass (*Cynodon dactylon*) will be prohibited, as this is defined as a weed.
9. Mexican Palo Verde (*Parkinsonia aculeatra*) will be prohibited as a harbinger of pests and because of its ability to spread throughout the development, thereby altering the present natural desert.
10. Desert Broom (*Buccharis sarathoroides*) plants are prohibited, as it is defined as a noxious weed, with the potential to spread throughout the development.
